"Archaeometric Studies of Ancient Ceramics from the Roman Villa of Aiano-Torraccia di Chiusi (Siena, Italia)"

Cavalieri, Marco

ABSTRACT

The roman villa of Aiano-Torraccia di Chiusi is located in Tuscany (San Gimignano, Siena -Italy), in the area so-called “alta Val d’Elsa”; this structure has been occupied continuately from the III sec. B.C until at least at the end of the VII A.D. The ceramic findings can be placed in a chronological range that goes from the second half-end of the V century A.D., until VII century A.D. A constant presence of ceramics acrome grezze, ingobbiate (red covered), acrome depurate and semidepurate, characterizes the phases of existence, neglect and collapse of the structure and of the tardoantico and altomedievale re-use. The abundance of so-called ceramics ingobbiate (red covered) and their relative large diffusion, represents a strongly element characterizing the tardoantichic and transition between tardoantichic and altomedievale phases. This prompts to the Université Catholique de Louvain and to the University of the Studies of Florence to performe a complete archeometric study o...

Dear Dr. CANTISANI*,

we are glad to inform you that the abstract entitled 
ARCHAEOOMETRIC STUDIES OF ANCIENT CERAMICS FROM THE ROMAN VILLA OF 
AIANO-TORRACCIA DI CHIUSI (SIENA, ITALIA) 
you submitted as a contribution to the XIV International Clay Conference has received a 
positive evaluation by the members of the Scientific Committee. It will be presented in the CE1 
session as Poster contribution.

Looking forward to meeting you in Italy next June, we wish to thank you for your contribution to 
the XIV ICC.

Best regards,
Saverio Fiore
Chair, XIV ICC
