The authors regret that in the Abstract and in the Molecular Analysis paragraphs of the above paper, the following was incorrect: “a homozygous c.131T > G (p.Leu44Pro) substitution”. This should read “a homozygous c.131T > C (p.Leu44Pro) substitution”.

The authors would like to apologise for any inconvenience caused. They would like to thank Sally Heywood, Research Assistant, Human Gene Mutation Database, Institute of Medical Genetics, Cardiff University for bringing this error to their attention.
